

	○ Heuristic Evaluation Workbook (each member must have their own evaluation) ○ Usability Testing Survey / Instruments used • Documentation: ○ Photos during testing ○ Supporting files or related documents
Results, Discussion, and Recommendation	• Summary of usability testing results • Key issues identified • Discussion of findings • Recommendations for improving the prototype • Suggested design improvements <i>Attach a PDF of the completed Heuristic Evaluation Workbook.</i>
Extra Pages (Optional)	Groups may include additional pages such as: • Reflections • Additional Findings • Prototype Walkthrough • Video Demonstration

TECHNICAL GUIDELINES:

- Website must be static (no backend or database).
 - Must be built using:
 - HTML
 - CSS
 - JavaScript (optional)
- Front-end frameworks (e.g., Bootstrap) are allowed.
- Code must be well-structured, organized, and readable.
- Include all necessary:
 - Images
 - Screenshots
 - Documents
- **REQUIRED DEPLOYMENT:**
- Must be deployed using one of the following:
 - **GitHub Pages**
 - **Netlify**
 - **Vercel**

FINAL DELIVERABLES (SUBMIT VIA GOOGLE CLASSROOM):

1. **Deployed Website Link**
 - a. Must contain complete documentation of the evaluation
 - b. Must be accessible and functional

RUBRICS: 30 POINTS

1. Content Completeness & Organization (8 points)

Rating	Description
8 – Excellent	All required pages and contents are complete, well-structured, and logically organized.
5 – Good	Most contents are present but with minor gaps or organization issues.
3 – Fair	Several sections are incomplete or poorly structured.
1 – Needs Improvement	Minimal content; lacks organization and required components.

2. Data Gathering Documentation (8 Points)

Rating	Description
8 – Excellent	Complete instruments, clear respondent data, and strong supporting documentation are presented.
5 – Good	Instruments and documentation are present but lack clarity or completeness.
3 – Fair	Limited documentation; some required instruments are missing or unclear.
1 – Needs Improvement	Minimal or no proper documentation of data gathering.

3. Results, Analysis & Recommendations (8 Points)

Rating	Description
8 – Excellent	Insightful analysis with clear issues identified and strong, relevant recommendations.
5 – Good	Analysis is present but lacks depth or clarity in some areas.
3 – Fair	Limited discussion; weak connection between findings and recommendations.
1 – Needs Improvement	Very minimal or unclear analysis.

4. Technical Implementation & Deployment (6 Points)

Rating	Description
6 – Excellent	Fully functional, well-designed website; successfully deployed with no issues.
4 – Good	Functional and deployed but with minor issues in design or structure.
2 – Fair	Website has major issues or incomplete deployment.
1 – Needs Improvement	Website is not functional or not deployed.

TOTAL POINTS: 30 points
